VERIFIED CODE-CONFIRMED NICHE UNRESOLVED ABOVE 1M

How to read this: rows are ranked by audience (biggest first). Only **VERIFIED** rows have a confirmed profile + brand promotion; **CODE-CONFIRMED** / **NICHE** / **UNRESOLVED** are a ranked research worklist (handle or brand-tie still to confirm). Follower counts are mostly estimates — social & stats sites block automated reads, and nothing here was fabricated or scraped past an anti-bot wall.
